88%
adoption among the first 100 users (WalkMe on SAP)

2 h → 10 min
per property valuation, automated with Claude API

−18%
daily workload for key business users

+20%
performance in the audited teams, the following quarter

Eight years leading projects and teams across Accenture, Mercado Libre and Australian mining operations. I combine change management with AI automation: I map processes, build workflows and design adoption and communication strategies.

PROJECTS & CHANGE MANAGEMENT

Founder & AI Transformation Consultant · Madiba — Dec 2025 – Present · Buenos Aires

- With founders and managers, I diagnose where the business stands on AI: which processes to optimize and which solutions add the most value, measured in hours recovered per month.
- Real-estate firm: diagnosis and automation in three weeks. Property valuations went from 2 hours to 10 minutes with an end-to-end flow on Make.com and the Claude API.
- Clothing brand: built an AI agent for the marketing team; management time dropped 87% (8 h → 1 h).
- Built a Python engine that assembles the sales pipeline from records the team already keeps, and a ClickUp ecosystem that replaced ad-hoc coordination.
- I turn tacit knowledge into documented workflows (SOPs): the layer most AI adoptions skip, and the reason they stall.

Change Management Consultant · Accenture — 2025 – 2026 · Buenos Aires

- Co-led a nine-month WalkMe PoC on SAP with another PM, for a very large US client.
- Ran the discovery that narrowed the PoC to five processes with real friction; key users' daily workload dropped 18%.
- Shipped 5 WalkMe builds to production through a three-gate validation chain (client PM → process SME → production).
- In the first post-launch measurement, the client recorded 88% adoption among the first 100 users and 20% less learning time.

Senior Product Team Leader · Mercado Libre — 2018 – 2020 · Buenos Aires

- Coordinated 4 team leaders and their IT analyst teams, keeping workstreams aligned and deliveries on track.
- Designed and ran a one-quarter performance audit of an external consultancy (50+ IT analysts): two independent scorings, cross-checked at the end. Performance improved 20% the following quarter.
- Restructured teams and resources based on the results: talent reallocated on performance, not perception.

BUILDS WITH

Claude API · Claude Code · Anthropic SDK · Python · Make.com · WalkMe · SAP · ClickUp · Notion · Monday.com · Google Workspace · Microsoft 365 · VS Code

OPERATIONS LEADERSHIP · AUSTRALIA

Team Leader · SRG Skilled Resources (Industrial / Mining) 2024 – 2025 · Australia

- Led teams in high-risk, safety-critical mining environments at BHP and FMG operations.
- Delivered projects under strict operational and safety standards, in remote, high-pressure settings, with multicultural teams.

Construction & Trades · Multiple sites 2020 – 2023 · Australia

- Hands-on work in construction, carpentry and metalwork, alongside teams from very different cultures.

CASE STUDIES

Full versions at lautarotapiaa.github.io

ACCENTURE · 2025–2026

Change management: getting the most out of technology they already owned

WalkMe PoC on SAP for a very large US client: 5 processes, 3 validation gates, 9 months.

88% adoption · −20% learning time

MADIBA · 2026

The risk of centralized efficiency: when the operation depends on one person

Real-estate firm with 70–100 weekly inquiries and no documented processes. Three weeks, end to end.

2 h → 10 min per valuation

MERCADO LIBRE · 2018–2020

The audit with a two-sided evaluation

4 team leaders, 50+ IT analysts and two scorings built in parallel, blind.

+20% performance the following quarter

SKILLS

Diagnosis & change

Organizational diagnosis · Change management & training · Adoption strategy · Discovery interviews · Digital adoption (SAP · WalkMe)

Process & AI

Process design & automation · AI-driven process optimization · Agent & workflow design · SOPs from tacit knowledge · Prompt & schema design

Delivery & governance

Scope, dependencies & risk · Validation gates · Roadmap & prioritization · Backlog management · Stakeholder management · Cross-functional team coordination

“He managed to learn a technical product and adapt to the client's demanding way of working. […] In critical moments, he stayed strongly committed and always met expectations.”

Julio Ruano · Manager at Accenture (translated from Spanish)
